Upper Bhima Project in Afzalpur Taluk

658. SRI D. B. KALMANKAR (Afzalpur).—Will the Minister of State for Major and Medium Irrigation be pleased to state:—

(a) whether the survey and estimate of Upper Bhima Project in Afzalpur Taluk, Gulbarga District has been done;

(b) whether it has come to the notice of the Government that Afzalpur Taluk is a recurring scarcity area;

(c) if so, whether the Government proposes to take up this project at the earliest?

SRI SUBHASH ASTHURE (Minister of State for Major and Medium Irrigation).—

(a) The Upper Bhima Project known as Bhima Lift Irrigation Project (Sonna Site) is under investigation.

(b) Yes.

(c) This will be considered after completion of investigation.

SRI D. B. KALMANKAR.—May I know since what time the investigation of Bhima Project in Afzalpur Taluk is going on?

† SRI SUBHASH ASTHURE.—The investigation is going on for the last 4 to 5 years. For certain obvious reasons phased schemes are got prepared and altered or remodelled. The investigation is in progress.

SRI D. B. KALMANKAR.—Is it not a fact that investigation was made for irrigation of two lakhs of acres of land on the present site and that report is also submitted to Government?

SRI SUBHASH ASTHURE,—Two schemes were prepared on the Upper Bhima Project, one at Chitapur Taluk near Swanthi to irrigate about 1.35 lakhs acres at a cost of 20.40 crores. A second scheme near Sonna site in Afzalpur was got prepared at a total cost of Rs. 35.35 cores to irrigate about 2 laksh acres. According to Krishna Tribunal only 15 TMCFT of water had to be used from the Bhima river which is one of the main tributaries to the Krishna. Under the changed circumstances, we have altered the plan to have one project at sonna and another Project at Swanthi to utilise 6TMCFT and 9 TMCFT of water respectively to irrigate about 51,200 acres and 75,000 acres and the altered projects are under investigation.

1-30 P.M.

SRI D. B. KALMANKAR.—Now, already over 5 years have passed and the Hon. Minister just now said that 15 T.M.C.F.T. of water are available for both the projects. He also said that 6 T.M.C.F.T. will be available for Sonna Project. Since, as admitted in reply to clause (b), Afzalpur Taluk is a recurring scarcity area, will the Government take steps to see that this investigation is completed and the work is taken up at the earliest?

SRI SUBHASH ASTHURE.—As I have already said, the plans of the first two projects have been sent to the C.P.W.C. for approval. We have also altered the entire scheme. We are seriously thinking whether

it should have lift irrigation or flow irrigation. Again, in the case of lift irrigation it is a question of power shortage and all that. Because of these obvious reasons so much of delay has been caused. Government is well aware that especially Afzalpur Taluk in Gulbarga District is a droughtprone area.
